### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 02 June 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lu (6,143,366) in view of Suzuki et al. (6,548,342 B1).

As to claim 1, Lu teaches a method of manufacturing a ceramic film comprising crystallizing a raw material including a complex oxide by subjecting the raw material to a heat treatment in an atmosphere pressurized to two atmospheres or more as detailed in example 1, in column 7, lines 5-48. The pressure is 47.6atm and 78.9atm, well above the recited limitation of '2 atmospheres or more'. Lu also teaches that a vapor is in the crystallization chamber and that the vapor is from water. Lu does not specifically teach oxygen at a volume ratio of greater than or equal to 1% but less than or equal to 10%. However, Suzuki et al. also teach crystallization of a ceramic film as detailed in column 3, lines 4-20. Further, Suzuki et al. teach a concentration of oxygen in the atmosphere to be greater than 0.1% and less than 5.0%, which overlaps the recited range within the claim. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the method of Lu with an oxygen

concentration as taught by Suzuki et al. so as to enhance electrical characteristics of the oxide dielectric film.

***Allowable Subject Matter***

Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claim 9 is dependent upon claim 8.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Geyer whose telephone number is (571) 272-1958. The examiner can normally be reached on weekdays, between 10:00am - 6:30pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Lebentritt can be reached on (571) 272-1873. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
